## Summary

Seasoned software engineer with 8+ years of full-stack product development experience. Passionate about creating products that are both user-friendly and technically robust. Core stacks are centered around JavaScript technologies including **React** and **Next** for frontend development, **Node**, **Express**, and **Nest** for backend services, **PostgreSQL** and **MongoDB** for databases, and **Docker** with **GitHub Actions** for CI/CD. Well-versed in a variety of other tools and frameworks, which helps me contribute effectively across the full development life cycle.
